

Outgoing
MOD10067 0002
Task 2771
(See Western
Utah Copper Amend-
ment)

From: Paul Baker
To: Wunderlich, Ron
Subject: Re: Fw: Emailing: Amend Request

Ron--

Tom forwarded to me your e mail and attachment wherein, as I understand it, WUCC proposes to drill a water well and add some pipelines. It is not clear from the letter exactly what is being proposed. Please resubmit the proposal as an amendment to the plan, and please use the attached form MR-REV. All appropriate text and maps in the plan that are affected by this modification should be changed. A cover letter describing the nature of the amendment would also be helpful.

I do not anticipate the Division's review process being complicated or time consuming, but it will likely be necessary to adjust the reclamation surety.

The reason we need you to submit the amendment so it can be inserted in the plan is this. If we allow modifications to be submitted as letters with attached maps, pretty soon we have a file full of plan changes, and the plan is completely obsolete. A person would have to research the entire file to figure out what the plan is. The plan needs to be a single, consolidated document.

Please let us know if you have questions about this process.
